

## Services Offered

Detailed Engineering and Design • Engineering design and analysis of electrical and mechanical installations • Equipment design • Procurement of drawings and specifications • Development of detailed cost estimates • Procurement of equipment and construction services • Document and material control • Configuration management

Agricultural Development • Project financing  
• Feasibility studies and reports  
• Site selection studies  
• Market surveys  
• Concept design  
• Cost estimates  
• Critical path planning and cash flow forecasting

Preliminary Engineering (Project Definition) • Project financing  
• Feasibility studies and reports  
• Site selection studies  
• Market surveys  
• Concept design  
• Cost estimates  
• Critical path planning and cash flow forecasting

Construction • Planning and co-ordination of construction work on site  
• Resident engineering management  
• Vendor engineering  
• Field engineering management  
• Expediting  
• Progress and cost reporting  
• Safety programmes  
• Inspection and construction testing  
• Quality assurance and control  
• As-built drawings
